PROFILE

I'm Tamir Banay, currently looking to integrate into a development team. By engaging in different projects, I found that I have become a fast learner as I need to adapt quickly to changes. As a result, I'm constantly learning and improving my experience. Therefore, I'm looking to see where I can contribute to the value of a company and its customers.

PROJECTS

PayWise

Developing a site that provides digital wallet of vouchers.

- Frontend – React
- Backend –Django
- mySQL

Link to project
